# Chronograph

Chronograph provides next-generation portfolio monitoring, reporting, and diligence tools for institutional limited partners and general partners. Chronograph offers two solutions for private capital investors — Chronograph GP and Chronograph LP.

Chronograph LP brings complete transparency to private capital exposures at all levels, from underlying portfolio companies and assets to funds, vehicles, commitments, and more.

Chronograph GP automates portfolio company data collection, analytics, valuation, reporting, and information warehousing for investors.

Chronograph offers a high integrity, centralized data collection system that empowers private capital investors to properly collect, manage, and report ESG standards. Chronograph enables users to access meaningful, performance-based, and comparable ESG data from across their portfolio from a single interface.

We provide investors the world class technology they need to standardize fragmented, opaque information via a sophisticated data model paired with simple-to-implement workflows. The result is unparalleled simplicity in structuring, accessing, reporting, and analyzing proprietary investment data.

## Focus:

Reporting, Portfolio monitoring

## Geography:

Belgium, Netherlands, Luxembourg, France, Germany, Spain, United States

## Digit Mint

Digit Mint's software enables the following:

- Double materiality assessments: in line with CSRD our software easily identifies the right topics to assess and engages efficiently with your stakeholders. All while making sure you get your auditable & compliant report at the end.

- CSRD reporting: Once the scope of your ESG reporting, in line with CSRD, has been defined, our software guides, assists and provides a collaborative platform for companies to bring all reporting data together. The creation, audit & repeatability becomes thus much easier.

- Calculations: Our visually very intuitive calculation module can calculate, based on latest scientific data, the impact of your product, activity or business. We can measure GHG emission, to impact on human health all the way to eco-toxicity.

### Focus:

Regulatory framework, Reporting, Carbon accounting

## Impaakt

Impaakt is a fintech company that uses collective intelligence and AI to measure the real impact companies have on the environment and society, going beyond ESG. Impaakt has built and brought together a community of 50,000+ contributors who collectively document, verify, analyse, and assess the positive and negative impact that businesses have on the planet and society. Through our unbiased approach, the platform is designed to help investors and citizens avoid greenwashing. It tackles many of the problems that existing data and reporting tools have been called out for by providing robust, simple, transparent, and opposable impact research. Our data is utilised by the financial industry and corporates to ensure better decisions are made, for a more sustainable and inclusive future.

### Focus:

Regulatory framework, Reporting, Training, Impact research, scores and metrics

### Geography:

Belgium, Netherlands, Luxembourg, France, Germany, Switzerland

### End users:

Funds, Companies/ corporates, Consultants, Banks, Asset owners

### Website:

## RepRisk AG

RepRisk is an ESG Data provider RepRisk exclusively focuses on ESG and business conduct risks such as environmental degradation, coal, child labor, weapons, corruption, fraud and more. The purpose of its dataset is not to provide ESG ratings, but to systematically identify and assess material ESG risks. Looking beyond just controversies, RepRisk covers the full spectrum of risks, from low-severity adverse incidents to criticism and allegations to accidents and lawsuits.

RepRisk is the first and only provider to leverage the combination of AI and advanced machine learning with human intelligence to analyze public sources and identify ESG risks related to companies and infrastructure projects. Offering the longest daily point-in-time data in the industry with unchanged methodology since 2007, RepRisk delivers ESG risk research and metrics for more than 220,000 companies and 60,000 infrastructure projects across all sectors and all countries. RepRisk's clients are the world's leading institutions including banks, insurance companies, investment managers, and non-profits – who all trust RepRisk for due diligence and ESG integration across their operations, business relationships, and investments

### Focus:

ESG and business conduct risks

### Geography:

### Website:

[www.tapioview.com](http://www.tapioview.com)

### Contact person:

[valentina@tapioview.com](mailto:valentina@tapioview.com)

## The Ecological Entrepreneur

The Ecological Entrepreneur aims to bring economy and sustainability together. We guide companies to become climateneutral, and in a broader sense sustainable. We do this by building up knowledge internally (through surveys and workshops), analysis of relevant ESG criteria (with a focus on carbon), translation to strategy and an actionplan, which is then translated into an implementation plan. At the end we help with SaaS, Sustainability as a Service, where we are the Sustainability Manager ad interim for your company.

### Focus:

Regulatory framework, Reporting, Carbon accounting, Training, Generic ESG strategy, reporting & implementation

### Geography:

Belgium, Netherlands, Luxembourg

### End users:

Funds, Companies/ corporates, Banks

### Website:

[www.theecologicalentrepreneur.be](http://www.theecologicalentrepreneur.be)

### Contact person:

[sebastiaan.deblock@t-ee.eu](mailto:sebastiaan.deblock@t-ee.eu)

## Upright

Upright provides science-based net impact data of both public and private companies, complemented with UN SDGs, EU taxonomy and SFDR PAI indicators. The quantification model is based on a neural network summarising 250M+ scientific articles and a proprietary taxonomy of 150,000+ product and service categories. Upright's impact data is currently being used by 200+ investors and companies, such as EQT, LGT Capital Partners, Summa Equity, Lightrock and Brightlands Venture Partners. Main use cases include screening, impact DDs, reporting and SFDR Article 8/9 compliance. See an example Upright impact profile here (hyperlink: <https://uprightplatform.com/company/5b756ca2-398c-41d6-9962-1289a8e9a473/Virta>).

### Focus:

Regulatory framework, Reporting, Impact quantification

### Geography:

Belgium, Netherlands, Luxembourg, France, Germany, Sweden, Norway, Denmark, Finland, Estonia, UK, Ireland, Switzerland, Italy, USA, Canada, Japan, Indonesia, Singapore

### End users:

Funds, Companies/ corporates

### Website:

<http://uprightplatform.com/>

### Contact person:

[toni.laitila@uprightproject.com](mailto:toni.laitila@uprightproject.com)

## Wequity

Wequity's ESG Reporting Platform enables companies and private equity funds to generate comprehensive reports on environmental, social, and governance (ESG) metrics with the least amount of effort. We are a Belgian startup founded early 2021 and supported by investors like Piet Colruyt, Pierre De Muelenaere, Sebastiaan De Boe, Guillaume van Rijckevorsel, Benoit De Bruyn, and Birdhouse.

With Wequity you can set an ESG Strategy and roadmap with clear objectives, and follow your progress regularly whilst all the data collection and analysis is managed for you. Wequity enables you to comply with the latest ESG regulations or develop your ESG reporting according to any ESG framework that you want by customising the frameworks yourself.

Your company and stakeholders can save time and resources that would otherwise be spent collecting and analysing data. Instead, you can focus on verifying the answers and uploading the reports, while the tool handles the more tedious aspects of the process.

The platform automates the collection of data related to ESG topics and generate a report based on the collected data. By using AI, the tool is able to quickly and accurately identify relevant information within a client's internal documents (e.g., PDFs, csv, ERP systems, accounting docs, payslips, etc.). This means that you only have to upload your internal documents, and Wequity will pre-fill your ESG questionnaire and report through automated data identification and calculation. All you need to do is to verify the content and publish your report.

### Focus:

Regulatory framework, Reporting, ESG Media Screening

### Geography:

Belgium, Luxembourg, France, UK

### End users:

Funds, Companies/ corporates

### Website:

<https://www.wequity.app/>

### Contact person:

[gabriel@wequity.app](mailto:gabriel@wequity.app)

## Worldfavor

Worldfavor is a global platform for sustainable business decisions. The company was founded in 2016 based on the idea that every person and business can create a difference by making sustainable decisions. Worldfavor has experienced extraordinary growth since the launch and has seen year-on-year surges in user uptake. Ever since the start, Worldfavor has attracted leading organizations, and the company is proud to have clients in industries from food to finance, ranging from medium-sized enterprises to Fortune 500 companies. Prominent clients include Nudie Jeans (frontrunner in sustainable denim production), IK Partners (European private equity advisory group with Nordic roots, operating across Northern Europe), Systembolaget (the Swedish monopoly for alcohol), Oatly (Swedish food company that produces oat-based alternatives to dairy products), Oakley Capital (private equity investor) and Grant Thornton (one of the world's largest accounting and consulting firms).

### Focus:
